DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

(a) claims 1-3, 5-14, directed to an embodiment wherein the online auction even being a reverse auction event, wherein the first party is a buyer; or

(b) claims 1, 2, 4-8, 12 and 13, directed to an embodiment wherein the online auction event being a forward auction event, wherein the first party is a seller.

The species are independent or distinct because they are mutually exclusive, i.e. either there is no information for the second input or there is, but they cannot be both. Furthermore, application refers to these as separate embodiments in the specification (¶0016).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
